

# Vice City Cannabis Template - Customization Guide

---

## Overview

---

This guide explains how to customize the Vice City Cannabis template to match your brand identity while maintaining the bold, retro aesthetic.

## Color Scheme

---

### Default Colors

The template uses a vibrant, retro-inspired color palette:

- **Primary (Coral):** #FF6B6B - Main CTA buttons, accents
- **Secondary (Teal):** #4ECDC4 - Secondary buttons, links
- **Accent (Yellow):** #FFE66D - Highlights, decorative elements
- **Purple:** #A463F2 - Additional accent color
- **Dark:** #1A1A2E - Text, dark sections
- **Light:** #FAFAFA - Backgrounds, light sections

### Customizing Colors

#### Via Tenant Admin Dashboard:

1. Go to Tenant Admin → Branding
2. Scroll to “Color Settings”
3. Update color values:
  - Primary Color: Main brand color
  - Secondary Color: Complementary color
  - Accent Color: Highlight color
4. Click “Save Changes”

#### Color Recommendations:

- Use high-contrast colors for accessibility
- Maintain readability (WCAG AA standards)
- Test colors on both light and dark backgrounds
- Keep brand consistency across all sections

## Typography

---

### Default Fonts

- **Headings:** Inter, Montserrat (bold, black weights)
- **Body Text:** Inter, sans-serif (regular, medium weights)

## Font Customization

### Via Tenant Admin Dashboard:

1. Go to Tenant Admin → Branding
2. Find “Typography Settings”
3. Update `fontFamily` field:  
`'YourFont', 'FallbackFont', sans-serif`
4. Click “Save Changes”

### Recommended Font Pairings:

- **Modern:** `'Poppins', 'Inter', sans-serif`
- **Classic:** `'Playfair Display', 'Lato', serif`
- **Bold:** `'Oswald', 'Roboto', sans-serif`
- **Friendly:** `'Nunito', 'Open Sans', sans-serif`

## Logo Customization

---

### Logo Upload

1. Go to Tenant Admin → Branding
2. Scroll to “Logo Settings”
3. Click “Upload Logo”
4. Select image file (PNG, JPG, SVG)
5. Recommended size: 200x200px to 400x400px
6. Logo appears in:
  - Navigation bar
  - Hero section (optional overlay)
  - Footer

### Logo Best Practices

- Use transparent background (PNG)
- Ensure logo works on both light/dark backgrounds
- Keep file size under 500KB
- Use vector format (SVG) for best quality

## Hero Section

---

### Hero Image

#### Default Image:

- Retro comic-style illustration with vibrant colors
- Path: `/templates/gta-cannabis/hawaii-illustration-retro-comic-style.jpg`

#### Custom Hero Image:

1. Go to Tenant Admin → Branding
2. Scroll to “Hero Section”
3. Click “Upload Hero Image”
4. Select image file

5. Recommended size: 1920x1080px (16:9 aspect ratio)
6. File formats: JPG, PNG, WebP
7. Keep file size under 2MB

**Hero Image Tips:**

- Use high-resolution images
- Ensure good text contrast
- Consider mobile responsiveness
- Retro/comic style matches template aesthetic

## Hero Content

**Title & Subtitle:**

1. Go to Tenant Admin → Branding
2. Scroll to “Page Content”
3. Update:
  - `homeHeroTitle` : Main headline
  - `homeHeroSubtitle` : Supporting text
4. Keep titles concise (5-10 words)
5. Make subtitles descriptive (10-20 words)

**CTA Buttons:**

- Primary CTA: “Book Consultation” (links to consultation page)
- Secondary CTA: “Learn More” (scrolls to about section)
- Button colors auto-adjust to theme colors

## About Section

---

### Team Image

**Default Image:**

- Retro comic-style portrait
- Path: `/templates/gta-cannabis/woman.jpg`

**Custom Team Image:**

1. Go to Tenant Admin → Branding
2. Scroll to “About Section”
3. Upload custom image
4. Recommended size: 800x1000px (portrait orientation)
5. Shows your team or brand personality

### About Content

**Title & Description:**

1. Go to Tenant Admin → Branding
2. Scroll to “Page Content”
3. Update:
  - `aboutTitle` : Section headline
  - `aboutDescription` : Your brand story

4. Keep title punchy (3-6 words)
5. Make description compelling (50-100 words)

### Stats Grid:

Default stats (hardcoded in template):

- 5+ Years Experience
- 10K+ Happy Patients
- 100% Compliant

To customize stats, you'll need to modify the `About.tsx` component.

## Features Section

---

### Feature Icons & Content

Default features:

1. Certified & Compliant
2. Premium Quality
3. Expert Guidance
4. Fast Delivery
5. Patient Support
6. Verified Products

### Customizing Features:

Features are hardcoded in `Features.tsx` component.

To add/modify features:

1. Edit `components/Features.tsx`
2. Update `features` array
3. Redeploy template

## Product Showcase

---

### Product Categories

Default categories:

- Flowers 🌸
- Oils 💧
- Edibles 🍷
- Vapes 🚬

### Category Customization:

Categories are hardcoded in `ProductShowcase.tsx` component.

To customize:

1. Edit `components/ProductShowcase.tsx`
2. Update `productCategories` array
3. Change icons, names, descriptions
4. Redeploy template

## Consultation CTA

---

### CTA Content

#### Title & Description:

Default:

- Title: "Ready to Get Started?"
- Description: "Book your free consultation..."

#### Customizing:

1. Edit `components/ConsultationCTA.tsx`
2. Update text content
3. Modify consultation steps
4. Adjust button styling
5. Redeploy template

## Footer

---

### Footer Content

#### Sections:

1. Company Info (business name, description, social links)
2. Quick Links (products, consultation, about, how it works)
3. Resources (FAQ, conditions, privacy, terms)
4. Contact Info (email, phone, address)

#### Customizing Footer:

1. Edit `components/Footer.tsx`
2. Update:
  - Social media links
  - Contact information
  - Navigation links
  - Copyright text
3. Redeploy template

## Animations

---

### Scroll Animations

The template uses Framer Motion for:

- Fade-in effects
- Slide-in transitions
- Parallax scrolling
- Hover effects

#### Animation Settings:

- Trigger: When element enters viewport
- Duration: 0.6s - 0.8s
- Delay: Staggered (0.1s - 0.2s per item)

- Easing: ease-in-out

### Customizing Animations:

Edit `motion` components in each section:

```
<motion.div
  initial={{ opacity: 0, y: 30 }}
  animate={{ opacity: 1, y: 0 }}
  transition={{ duration: 0.8 }}
>
  {/* Content */}
</motion.div>
```

## Responsive Design

---

### Breakpoints

- **Mobile:** < 768px
- **Tablet:** 768px - 1024px
- **Desktop:** > 1024px

### Mobile Optimizations

- Stacked layouts on mobile
- Larger touch targets (48x48px min)
- Simplified navigation
- Optimized images (WebP format)
- Reduced animation complexity

## Performance Optimization

---

### Image Optimization

1. Use Next.js `Image` component (done by default)
2. Serve images in WebP format
3. Implement lazy loading
4. Use responsive images
5. Compress images (TinyPNG, ImageOptim)

### Code Optimization

- Minimize bundle size
- Code splitting
- Tree shaking
- Lazy load components
- Optimize fonts (subset, preload)

## Accessibility

---

### WCAG AA Compliance

- Color contrast ratios > 4.5:1

- Keyboard navigation support
- Screen reader friendly
- Semantic HTML
- ARIA labels where needed

## Testing Accessibility

1. Use browser devtools (Lighthouse)
2. Test with screen readers (NVDA, JAWS)
3. Keyboard-only navigation
4. Color blindness simulators

## Advanced Customization

---

### Modifying Components

1. Clone template repository
2. Edit component files:
  - `components/Hero.tsx`
  - `components/About.tsx`
  - `components/Features.tsx`
  - etc.
3. Test locally: `yarn dev`
4. Push changes to GitHub
5. Re-upload template via Super Admin

### Adding New Sections

1. Create new component: `components/NewSection.tsx`
2. Import in `index.tsx`
3. Add to template render:

```
tsx
  <NewSection {...props} />
```
4. Update `template.config.json` features
5. Redeploy template

### Styling Guidelines

- Use Tailwind CSS classes
- Add custom styles in `styles.css`
- Follow BEM naming convention
- Keep styles scoped to template
- Use CSS variables for theme colors

## Frequently Asked Questions

---

**Q: Can I use my own fonts?**

A: Yes, via Tenant Admin → Branding → Typography Settings

**Q: How do I change the color scheme?**

A: Via Tenant Admin → Branding → Color Settings

**Q: Can I add more sections?**

A: Yes, but requires editing component files and redeploying

**Q: Is the template mobile-friendly?**

A: Yes, fully responsive with mobile-first design

**Q: Can I remove sections?**

A: Yes, edit `index.tsx` and comment out unwanted sections

**Q: How do I update template content?**

A: Via Tenant Admin → Branding → Page Content

## Conclusion

---

The Vice City Cannabis template offers extensive customization options while maintaining its signature retro aesthetic. For advanced modifications, clone the repository and edit component files directly.
