Testing Workflows

Test 1: End-User Shopping Experience

1. **Visit Store**
   - Go to: `https://healingbuds.budstack.to`
   - Browse homepage
2. **View Products**
   - Click "Products" in navigation
   - Browse product catalog
   - Click on a product for details
3. **Create Account**
   - Click "Sign Up"
   - Fill registration form
   - Verify email (check inbox/spam)
4. **Add to Cart**
   - Browse products
   - Click "Add to Cart"
   - View cart (cart icon in header)
5. **Checkout**
   - Click "Checkout" in cart
   - Fill shipping information
   - Review order
   - Place order
6. **View Orders**
   - Go to Dashboard
   - View order history

- Check order status

Test 2: Tenant Admin Experience

1. **Login as Tenant Admin**
   - Go to: `https://budstack.to/tenant-admin`
   - Email: `admin@healingbuds.pt`
   - Password: `Admin123!`
2. **View Dashboard**
   - See order statistics
   - View recent activity
3. **Update Branding**
   - Click "Branding"
   - Navigate through 6 tabs:
     - Design (logo, hero section)
     - Colors (brand colors)
     - Typography (fonts)
     - Layout (structure)
     - Content (text)
     - Advanced (CSS, SEO)
   - Make changes
   - Click "Save Branding"
4. **View Live Store**
   - Click "View Live Store" button
   - Verify changes appear
5. **Manage Products**
   - Click "Products"
   - Browse product catalog
   - Toggle product visibility
6. **View Orders**
   - Click "Orders"
   - See customer orders
   - View order details
7. **Update Settings**
   - Click "Settings"
   - Update account information
   - Change preferences

Test 3: Super Admin Experience

1. **Login as Super Admin**
   - Go to: `https://budstack.to/super-admin`
   - Email: `admin@budstack.to`
   - Password: `SuperAdmin123!`
2. **View Dashboard**
   - Platform overview
   - Tenant statistics
   - Recent activity
3. **Manage Tenants**
   - Click "Tenants"
   - View all tenants
   - Click on HealingBuds

- View tenant details
4. **Process Onboarding**
   - Click "Onboarding"
   - View pending applications
   - Review application details
   - Approve or reject
5. **View Analytics**
   - Click "Analytics"
   - Platform-wide metrics
   - Tenant performance
   - Order trends
6. **Create New Tenant**
   - Option 1: Approve onboarding application
   - Option 2: Manual creation via database

Test 4: Onboarding New Tenant

1. **Access Onboarding Form**
   - Go to: `https://budstack.to/onboarding`
2. **Fill Application**
   - Business information
   - Contact details
   - Licensing information
   - Desired subdomain
3. **Submit Application**
   - Review information
   - Submit form
   - Wait for approval email
4. **Super Admin Reviews**
   - Login as super admin
   - Go to Onboarding tab
   - Review application
   - Approve
5. **New Tenant Created**
   - Subdomain created automatically
   - DNS configured (Namecheap API)
   - Welcome email sent
   - New tenant can login

Test 5: Password Reset Flow

1. **Forgot Password**
   - Go to: `https://budstack.to/auth/forgot-password`
   - Enter email address
   - Submit form
2. **Check Email**
   - Open email inbox
   - Find password reset email
   - Click reset link
3. **Reset Password**
   - Enter new password
   - Confirm new password

- Submit
4. **Login with New Password**
   - Go to login page
   - Use new credentials
   - Verify access

Test 6: Consultation Booking

1. **Login as Customer**
   - Email: `customer@example.com`
   - Password: `Test123!`
2. **Book Consultation**
   - Go to: `https://healingbuds.budstack.to/consultation`
   - Fill consultation form:
     – Medical condition
     – Current medications
     – Preferred date/time
     – Questions
3. **Submit Request**
   - Review information
   - Submit form
   - See confirmation message
4. **View in Dashboard**
   - Go to Dashboard → Consultations
   - See consultation request
   - Check status

Feature Checklist

Implemented Features

Multi-Tenant Core: - [x] Subdomain routing - [x] Tenant isolation (data) - [x] Custom branding per tenant - [x] NFT-based licensing (framework)

Authentication: - [x] User signup/login - [x] Email verification - [x] Password reset - [x] Role-based access (Super Admin, Tenant Admin, User)

Tenant Admin: - [x] Dashboard with statistics - [x] 6-tab branding system - [x] Product management (view/toggle) - [x] Order management (view) - [x] Settings

Super Admin: - [x] Platform dashboard - [x] Tenant management - [x] Onboarding approval - [x] Analytics

Customer Features: - [x] Product catalog - [x] Shopping cart - [x] Checkout process - [x] Order history - [x] Consultation booking - [x] User dashboard

Content Pages: - [x] Homepage - [x] About - [x] How It Works - [x] Conditions Treated - [x] FAQ - [x] Contact - [x] Blog - [x] Legal pages (Terms, Privacy, Cookies, Regulatory)

Integrations: - [x] Doctor Green API (with fallback to mock data) - [x] Namecheap API (subdomain creation) - [x] Email system (SMTP) - [x] Cloud storage (AWS S3 for logos)

Known Limitations & Future Enhancements

Current Limitations

Doctor Green API: - Using mock data (API credentials not fully functional) - Fallback mechanism in place

Payment Processing: - Not integrated (cannabis payment restrictions) - Order placement works, but no payment gateway

Custom Domains: - Framework in place - Manual setup required (not fully automated)

Planned Enhancements

Phase 2: - [ ] Billing & subscriptions (non-Stripe solution) - [ ] Enhanced analytics with charts - [ ] Email templates customization - [ ] SMS notifications - [ ] Inventory management - [ ] Advanced order fulfillment

Phase 3: - [ ] Mobile app - [ ] Advanced reporting - [ ] Customer loyalty program - [ ] Affiliate system - [ ] Multi-language support

---

Troubleshooting

Common Issues

Can't Login: - Verify email and password - Check caps lock - Try password reset - Clear browser cache

Branding Changes Not Showing: - Click "Save Branding" - Refresh store page (Ctrl+F5) - Wait 5 minutes for cache - Try incognito mode

Products Not Loading: - Doctor Green API may be down - Mock data should display instead - Check browser console for errors - Contact support

Subdomain Not Accessible: - DNS may still be propagating (wait 30 minutes) - Clear DNS cache - Try different browser/device

---

Quick Start Commands

For Developers

Start Development Server:

```
cd /home/ubuntu/healingbuds_website/nextjs_space
yarn dev
```

Run Database Migrations:

```
cd /home/ubuntu/healingbuds_website/nextjs_space
yarn prisma migrate dev
```

Seed Database:

```
cd /home/ubuntu/healingbuds_website/nextjs_space
yarn prisma db seed
```

Generate Prisma Client:

```
cd /home/ubuntu/healingbuds_website/nextjs_space
yarn prisma generate
```

Build for Production:

```
cd /home/ubuntu/healingbuds_website/nextjs_space
yarn build
```

Start Production Server:

```
cd /home/ubuntu/healingbuds_website/nextjs_space
yarn start
```

Support & Contacts

Technical Support: - Email: support@budstack.to - Response: Within 24 hours

Emergency Issues: - Production outages - Security concerns - Data loss

Feature Requests: - Email: features@budstack.to - Include detailed description

Bug Reports: - Email: bugs@budstack.to - Include: Steps to reproduce, expected vs actual behavior

---

Deployment Information

Current Deployment: - Platform: Abacus.AI hosting - Domain: `budstack.to` (to be deployed) - Status: Development/Staging

Production Checklist: - [ ] Deploy to production server - [ ] Configure production database - [ ] Set up production environment variables - [ ] Configure custom domain - [ ] Enable SSL certificate - [ ] Set up monitoring - [ ] Configure backups - [ ] Test all features in production
